Managua, Nicaragua · +505 8399 2586 · omarboza@gmail.com · [linkedin.com/in/omar-boza](https://www.linkedin.com/in/omar-boza) · github.com/Oamazon · amazon.github.io/resume

PROFESSIONAL SUMMARY

Senior WordPress Developer and Technical Lead, fluent in English (EF SET C2) and Spanish, delivering custom WordPress websites for U.S. and international clients. Expertise in PHP, custom themes and plugins, ACF-powered editorial components, Gutenberg blocks, performance, and caching. Trusted to make architecture decisions, solve production issues, and lead delivery through launch; based in Managua, Nicaragua and available for remote work.

TECHNICAL SKILLS

WordPress: Architecture, Custom Themes & Plugins, Advanced Custom Fields (ACF), Options Pages, Configurable Components, Gutenberg Blocks, WooCommerce, Elementor, DIVI, Bricks, CRM/API/Webhook Integrations
PHP & Frontend: PHP, Laravel, JavaScript, CSS, HTML, Responsive Design, WordPress theming and plugins
Infrastructure & Performance: WP Engine, Hostinger, HostGator, GoDaddy, WP Rocket, DNS, Backups, Migrations, Caching, Core Web Vitals, GTmetrix, Nginx, Apache, Git
Leadership & AI: Tech Lead, Project Management, Mentoring, Cursor, Claude Code, n8n, AI-assisted development
Also experienced: Webflow, Shopify site administration, React, Next.js, TypeScript, Node.js, REST APIs
Languages: English (EF SET C2 - cert.efset.org/B6TnCM), Spanish (native)

PROFESSIONAL EXPERIENCE

Web Developer — [Your Digital Resource](#), Florida, US (Remote)

Jan 2024 – Aug 2026

- Managed maintenance, development, and optimization across multiple concurrent WordPress clients, including external WordPress sites and unfamiliar codebases not originally built by the team.
- Administered hosting operations as part of the team - WP Engine, Hostinger, HostGator, GoDaddy, and WP Rocket - and resolved multi-layer cache and production issues.
- Integrated WordPress with third-party CRMs, email platforms, APIs, and webhook-based workflows.
- Administered existing Shopify client sites, making content and platform edits.
- Improved client sites from GTmetrix Grade F to A and reduced optimization from 90 to 20 minutes; cut repetitive Webflow/WordPress work from days to hours with AI-assisted workflows.
- Collaborated day-to-day with designers, developers, and project managers on project delivery.
- Delegated tasks and provided technical guidance when onboarding new developers.

Software Engineer — [Nicasource](#), Florida, US (Remote)

2022 – 2024

- Made the feasibility call that Hope of America could ship its seat-booking system inside WordPress, modeling seats, availability, and bookings with custom post types and metadata instead of a separate application.
- Owned WordPress delivery for international client requirements, including custom functionality, frontend implementation, and maintainable editor workflows.
- Built configurable components for Sucuri with Advanced Custom Fields (ACF) when the native editor could not meet the client's needs; created an options page and fields for text, colors, and component variants.

SEO Specialist — [Top Floor Marketing](#), Managua, Nicaragua

2020 – 2022

- Built automation workflows that increased lead volume across client portfolio sites by 30%.
- Built and maintained WordPress sites with Elementor and DIVI; daily work included Core Web Vitals, performance, and on-page SEO optimization.
- Contributed technical recommendations that shaped the team's approach to automation and SEO across the client portfolio.

Project Manager and Tech Lead — [AIM Services](#), Managua, Nicaragua

2019 – 2020

- As Project Manager and Tech Lead, led a team of 4 and recovered a year-delayed web + mobile application: web and mobile had drifted onto duplicated, out-of-sync logic; put both sides back on one source of truth and shipped to production in 3 months.
- Owned architecture and delivery for company projects, including a dual web/mobile application built with Ionic.

Web Developer — [Target Ogilvy](#), Managua, Nicaragua

2017 – 2019

- Worked directly with designers to turn creative concepts into technically feasible websites aligned with the visual direction, client requirements, and project timelines.
- Built client websites from scratch and with Elementor and DIVI, combining custom PHP development with page-builder delivery.
- Implemented and administered WooCommerce sites for agency clients.
- Introduced Laravel into projects previously built in plain PHP, expanding the maintainable features the agency could deliver to clients.
- Developed real-time PHP systems for special events and live campaigns, where reliability was visible to audiences in the moment.

SELECTED PROJECTS

Sucuri Blog - Configurable WordPress components (Nicasource) - Built new components with ACF and an options page so the client could adjust text, colors, and variants in WordPress; served as primary client contact for the high-traffic blog. - blog.sucuri.net

Hope of America - Seat booking in WordPress - Designed seats, availability, and booking workflows with custom post types and metadata; shipped on one WordPress codebase. - hopeofamerica.org

Somos Iberoamérica - Completely rebuilt the site as a custom WordPress implementation using PHP and custom Gutenberg blocks, packaged as a WordPress plugin for maintainable editor workflows. - somosiberoamerica.org

BYD El Salvador - Built a custom WordPress site for an automotive brand with Elementor, extending its native capabilities through PHP and JavaScript components integrated with the Elementor API. - bydelsalvador.com

DentistFL & Cardinal Park Family Dental - Your Digital Resource - Delivered Elementor sites with the team. - dentistfl.com · cardinalparkfamilydental.com
