Omar Boza

Senior Frontend / Full-Stack Developer | Tech Lead | React, Next.js, TypeScript, Tailwind, PostgreSQL

Managua, Nicaragua · +505 8399 2586 · omarboza@gmail.com · linkedin.com/in/omar-boza · github.com/Omazon · omazon.github.io/resume

PROFESSIONAL SUMMARY

Senior Frontend and Full-Stack Developer with technical leadership experience building scalable, production-ready web applications. Strong expertise in React, Next.js, TypeScript, Tailwind CSS, REST APIs, PostgreSQL, and Vercel, with a proven ability to lead delivery, improve application performance, and solve complex technical challenges. Experienced in AI-assisted development and modern engineering workflows. Fluent in English (EF SET C2) and Spanish; based in Managua, Nicaragua and available for remote work.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS, Vue, Responsive Design, Figma, Vite, Webpack

Backend & Data: PostgreSQL, SQL, relational schema design, REST APIs, Node.js, Express, NestJS, Insforge, Supabase, MongoDB, serverless API routes

Cloud, Git & Ops: Vercel, Git, GitHub, CI/CD familiarity, Playwright, Proxmox, Nginx, AWS S3, application optimization, Core Web Vitals

Security & Privacy: Role-based access control (RBAC), least privilege, secure authentication/session awareness, authorization, data access controls, healthcare data privacy awareness

AI-assisted development: Cursor, Claude Code, MCP, n8n; Playwright CLI testing with AI; responsible use when working with sensitive data

Also experienced: WordPress, Webflow, PHP, Laravel, custom application development, AI-assisted coding

Languages: English (EF SET C2), Spanish (native)

SELECTED PROJECT

Custom MCP servers (personal projects) - Built MCP servers from scratch to connect AI tools with application functionality.

AIDA — Production HealthTech SaaS for dental clinics, requested by a practicing dentist. Built end-to-end: patients, odontograms, appointments, clinical records, and payments. Stack: Next.js, React, TypeScript, Tailwind CSS, PostgreSQL/SQL, REST APIs. Deployed on Vercel with a self-managed Insforge (PostgreSQL) backend. Implemented role-based access control so clinical data is visible only to authorized physicians; designed around least-privilege and healthcare data privacy (HIPAA-conscious practices). · In production

Seat-level booking in WordPress — Feasibility call at Nicasource; shipped inside WordPress on one codebase.

Year-late web + mobile rescue — Tech Lead at AIM Services; production in 3 months after resyncing drifted stacks.

Scalar — Custom frontend product component implementation. · scalar.io/product

PROFESSIONAL EXPERIENCE

Web Developer — Your Digital Resource, Florida, US (Remote) **Jan 2024 – Aug 2026**

- Used multiple Model Context Protocol (MCP) servers with AI tools to troubleshoot technical issues and support development workflows.
- Delivered client projects from initial setup through production, including domain, DNS, and server management.
- Was the team's reference for WordPress and front-end: unusual WordPress behavior, multi-layer cache issues that hid shipped changes, and Webflow/CSS blockers got escalated to me; onboarded new developers.
- Diagnosed and fixed multi-layer cache issues that made correct deployments look like failed changes, then optimized the layers so the problem stopped recurring.
- Built AI-assisted workflows (Cursor, Claude Code, n8n) that cut repetitive UI/content edits from days to hours and performance optimization from 90 to 20 minutes (GTmetrix Grade F to A).
- Debugged and optimized Core Web Vitals and page-load issues across multiple concurrent client projects in a fast-moving remote team.
- Used Playwright from the command line, with AI-assisted workflows, to run and iterate automated UI checks.

Software Engineer — Nicasource, Florida, US (Remote) **2022 – 2024**

- Made the feasibility call that a client seat-reservation system could ship inside WordPress — modeling seats, availability, and bookings with custom post types and meta — instead of a separate application.
- Owned delivery of client web applications using React and Vue, including reusable UI components and responsive layouts.
- Contributed to frontend architecture, component design, and application performance across concurrent international projects.

SEO Specialist / Web Developer — Top Floor Marketing, Managua, Nicaragua **2020 – 2022**

- Built automation workflows that increased lead volume across client portfolio sites by 30%.
- Optimized Core Web Vitals and on-page performance for production marketing sites.

Project Manager and Tech Lead — AIM Services, Managua, Nicaragua **2019 – 2020**

- As Tech Lead, recovered a year-delayed web + mobile application: web and mobile had drifted onto duplicated, out-of-sync logic; put both sides back on one source of truth and shipped to production in 3 months.
- Owned architecture and delivery for a dual web/mobile application built with Ionic and modern JavaScript.

Web Developer — Target Ogilvy, Managua, Nicaragua **2017 – 2019**

- Introduced Laravel into plain-PHP projects, expanding maintainable backend/API capabilities for agency clients.
- Developed real-time web systems for live events and campaigns, where failures were visible to audiences in the moment.

CERTIFICATIONS

EF SET English Certificate — C2 Proficient · Aug 29, 2026 · cert.efset.org/B6TnCM

EDUCATION

Computer Engineering — National Engineering University, Nicaragua **2010 – 2015**

Continuous Learning — Udemy, Platzi: React, Next.js, TypeScript, PostgreSQL, AI-assisted development **2015 – Present**
