Omar Boza

Senior WordPress Developer & Tech Lead | Custom Themes & Plugins, PHP, Gutenberg, REST APIs

Managua, Nicaragua (Latin America · U.S. CST/EST Timezone) · +505 8399 2586 · omarboza@gmail.com · linkedin.com/in/omar-boza · github.com/Omazon · omazon.github.io/resume

PROFESSIONAL SUMMARY

Senior WordPress Developer and Technical Lead with 9+ years of experience engineering high-performance consumer-facing WordPress websites and custom web applications for U.S. and international clients. Deep expertise in PHP architecture (OOP, custom classes, hooks, actions, filters, and debugging), modern WordPress core (custom themes, plugins, custom PHP templates, CPTs, Gutenberg blocks, and ACF), and frontend technologies (HTML, CSS, SCSS, JavaScript, jQuery, and AJAX). Proven track record integrating REST APIs (and GraphQL), handling external endpoints and JSON payloads, optimizing MySQL queries, and driving technical SEO, site speed optimization, mobile-first indexing, schema markup, and GA4/GTM tracking. Fluent in English (EF SET C2) and Spanish; based in Managua, Nicaragua (Latin America) and available for remote work aligned with U.S. time zones.

TECHNICAL SKILLS

WordPress & PHP: Custom Themes & Plugins, Custom PHP Templates, Custom Post Types (CPTs), Advanced Custom Fields (ACF), Options Pages, Configurable Components, Gutenberg Block Editor, Deep Troubleshooting, WooCommerce, Elementor, DIVI, Bricks

PHP & Frontend: PHP (OOP, Custom Classes, Hooks, Actions, Filters, Debugging), Laravel, HTML, CSS, SCSS, JavaScript (ES6+), jQuery, AJAX, Responsive & Mobile-First Design

APIs, Databases & Git: REST APIs, GraphQL, External Endpoints, JSON Payloads, CRM/API/Webhook Integrations, MySQL (Database Queries & Performance), Command-Line Git (CLI) & Repository Control

Technical SEO, Analytics & Speed: Technical SEO, Site Speed Optimization, Core Web Vitals, Mobile-First Indexing, Schema Markup (JSON-LD), Google Analytics 4 (GA4), Google Tag Manager (GTM), Custom JavaScript Events, Data Layer Pushes, Tracking Parameters, GTmetrix, WP Rocket, Multi-layer Caching

Infrastructure, Leadership & AI: WP Engine, Hostinger, HostGator, GoDaddy, DNS, Backups, Migrations, Nginx, Apache, Tech Lead, Project Management, Mentoring, Cursor, Claude Code, n8n, AI-assisted development, Webflow, Shopify site administration, React, Next.js, TypeScript, Node.js

Languages: English (EF SET C2 - cert.efset.org/B6TnCM), Spanish (native)

PROFESSIONAL EXPERIENCE

Web Developer — Your Digital Resource, Florida, US (Remote) **Jan 2024 – Aug 2026**

- Served as the team's technical escalation point for WordPress and frontend architecture across multiple concurrent WordPress clients, troubleshooting unfamiliar codebases and external WordPress sites.
- Engineered custom PHP templates, classes, hooks, filters, and responsive UI components using HTML, CSS, SCSS, JavaScript, jQuery, and AJAX.
- Integrated WordPress with third-party CRMs, email marketing platforms, REST APIs (and GraphQL), and webhooks, processing external endpoints and JSON payloads reliably.
- Configured Google Analytics 4 (GA4) and Google Tag Manager (GTM) tracking across client sites, implementing custom JavaScript events, data layer pushes, and tracking parameters for attribution.
- Diagnosed and eliminated persistent multi-layer caching issues, optimized MySQL queries, and administered hosting environments (WP Engine, Hostinger, HostGator, GoDaddy, Backups, DNS, WP Rocket) with command-line Git repository control.
- Led technical SEO and site speed optimization initiatives, including mobile-first indexing, Core Web Vitals, and schema markup—improving client sites from GTmetrix Grade F to A and cutting optimization time from 90 to 20 minutes.
- Used Model Context Protocol (MCP) servers with AI tools to cut repetitive Webflow/WordPress work from days to hours; administered existing Shopify client sites. Collaborated day-to-day with designers and PMs, delegated tasks, and mentored onboarding developers.

Software Engineer — Nicasource, Florida, US (Remote) 2022 – 2024

- Made the architectural feasibility call that Hope of America could ship its seat-booking system natively inside WordPress, modeling seat inventory, availability, and bookings using Custom Post Types (CPTs), metadata, custom PHP templates, core functions, and efficient MySQL queries instead of an external app.
- Owned WordPress delivery for international client requirements, engineering modular PHP solutions (custom classes, hooks, actions, filters) and responsive frontend components with modern JavaScript and SCSS.
- Built configurable components for Sucuri with Advanced Custom Fields (ACF) when native options were insufficient; created an options page and fields for text, colors, and component variants.

SEO Specialist — Top Floor Marketing, Managua, Nicaragua 2020 – 2022

- Collaborated with SEO and content teams to implement technical SEO requirements across consumer-facing WordPress websites, driving site speed optimization, Core Web Vitals, mobile-first indexing, and schema markup (JSON-LD).
- Configured GA4 and Google Tag Manager (GTM) tracking with custom JavaScript events and data layer pushes, and built automation workflows that increased lead volume across client portfolio sites by 30%.
- Built and maintained WordPress sites with Elementor and DIVI, providing technical recommendations that shaped client site architecture and performance.

Project Manager and Tech Lead — AIM Services, Managua, Nicaragua 2019 – 2020

- As Project Manager and Tech Lead, led a team of 4 and recovered a year-delayed web + mobile application: unified duplicated, out-of-sync logic into a single source of truth, cleared backlog debt, and shipped to production in 3 months.
- Owned technical architecture and delivery across company projects, including a dual web and mobile application built with Ionic.

Web Developer — Target Ogilvy, Managua, Nicaragua 2017 – 2019

- Collaborated directly with designers and creative directors to translate visual concepts into technically sound, responsive websites within project timelines.
- Built client websites from scratch and with Elementor and DIVI, integrating custom PHP development with page-builder delivery.
- Implemented and administered WooCommerce stores for agency clients.
- Introduced Laravel into projects previously built in procedural PHP, expanding the maintainable backend capabilities the agency could deliver.
- Developed real-time PHP systems for special events and live campaigns, where high availability and reliability were mission-critical.

SELECTED PROJECTS

Custom MCP servers (personal projects) - Built MCP servers from scratch to connect AI tools with application functionality.

Sucuri Blog - Configurable WordPress components (Nicasource) - Built new components with ACF and an options page so the client could adjust text, colors, and variants in WordPress; served as primary client contact for the high-traffic blog. - blog.sucuri.net

Hope of America - Seat booking in WordPress - Designed seats, availability, and booking workflows with custom post types and metadata; shipped on one WordPress codebase. - hopeofamerica.org

Somos Iberoamérica - Completely rebuilt the site as a custom WordPress implementation using PHP and custom Gutenberg blocks, packaged as a WordPress plugin for maintainable editor workflows. - somosiberoamerica.org

BYD El Salvador - Built a custom WordPress site for an automotive brand with Elementor, extending its native capabilities through PHP and JavaScript components integrated with the Elementor API. - bydelsalvador.com

DentistFL & Cardinal Park Family Dental - Your Digital Resource - Delivered Elementor sites with the team. - dentistfl.com · cardinalparkfamilydental.com

EDUCATION

Computer Engineering — National Engineering University, Nicaragua 2010 – 2015
