

# Omar Boza

Software Engineer · AI-Augmented Development · Automation

Managua, Nicaragua · +505 8399 2586 · [omarboza@gmail.com](mailto:omarboza@gmail.com) · [linkedin.com/in/omar-boza](https://www.linkedin.com/in/omar-boza) · [github.com/Oamazon](https://github.com/Oamazon)

## SUMMARY

Full-stack developer with 10 years of experience building web products for US and international clients. Stack includes TypeScript, Node.js, Express, SQL/MongoDB, and AWS S3. Ships faster with agentic AI workflows — Cursor, Claude Code, custom harnesses, prompt debugging, n8n, MCP — while maintaining production quality. Experienced tech lead and mentor across React, Vue, Webflow, WordPress, and AI-driven automation. Fluent in English and Spanish; experienced in remote, distributed teams.

## SKILLS

|                 |                                                                                                                                                                |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AI & Automation | Cursor, Claude Code, Opencode, MCP, n8n, Prompt Engineering, Prompt Debugging, Custom AI Harnesses, Agentic Coding Workflows, AI Agents, GPT Integrations, RAG |
| Frontend        | HTML, CSS, JavaScript, TypeScript, React, Vue, Next.js, Webflow, Tailwind CSS, Bootstrap CSS, Responsive Design                                                |
| Backend & Data  | Node.js, Express, NestJS, MongoDB, SQL, PostgreSQL, PHP, WordPress, REST APIs, Supabase, Insforge                                                              |
| Cloud & DevOps  | AWS S3, Vercel, Webpack, Vite, Nginx, Apache, Proxmox                                                                                                          |
| CMS & Tools     | Elementor, DIVI, Bricks, Gutenberg, SEO, DNS, Core Web Vitals, Figma                                                                                           |
| Leadership      | Tech Lead, Project Management, Mentoring, Teaching                                                                                                             |
| Languages       | English, Spanish (native)                                                                                                                                      |

## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |             |

| <ul style="list-style-type: none"><li>Built websites from scratch or using WordPress templates for agency clients.</li><li>Developed real-time PHP systems for special events and live campaigns.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |             |

SELECTED PROJECTS

---

- AIDA** — Production SaaS for dental clinics (patients, odontograms, appointments, records, payments). HIPAA-conscious role-based access so clinical data is restricted to authorized users. Next.js, TypeScript, Node, Tailwind, Insforge, PostgreSQL/SQL; Vercel + Proxmox.
- Client-First Skill for AI Agents** — Created open-source Agent Skill encoding Finsweet Client-First Webflow conventions for AI coding tools; self-contained SKILL.md plus 17 deep-dive references (github.com/Oamazon/First-Client-Webflow).
- AI Workflow Automations** — n8n pipelines connecting Webflow CMS to GPT assistants and bot workflows, with prompt debugging and custom AI harnesses for client content operations.
- AI-Ready Resume Site** — Portfolio optimized for AI/ATS parsing with JSON-LD, resume.json, and llms.txt (github.com/Oamazon/resume).
- BYD El Salvador** — WordPress site built from scratch with Elementor for automotive brand (bydelsalvador.com).
- Sucuri Blog** — High-traffic cybersecurity blog with performance and reliability optimization (blog.sucuri.net).

EDUCATION

---

- Computer Engineering** — National Engineering University, Nicaragua 2010 – 2015
- Continuous Learning** — Udemy, Platzi: web development, AI & automation 2015 – Present
